3. [REDACTED] close association with [REDACTED] as well as much work which he is doing for [REDACTED] in the fields of intelligence collection through scientific methods are reasons for clearing [REDACTED] for AQUATONE. Furthermore, [REDACTED] has become increasingly more associated with scientific techniques as developed by AQUATONE, and as such systems are unknown to him [REDACTED] is not able to put [REDACTED] to best advantage in OSI. Some conflict, as in [REDACTED] Int., exists regarding contractual arrangements between OSI, the [REDACTED] and AQUATONE. As a result of a discussion with [REDACTED] this date, we further feel that acutely some security risk exists in not briefing [REDACTED]
